overview

You have the right to make decisions about your health care. No health care may be given to you over your objections, and necessary health care may not be stopped or withheld if you object. In some cases, however, because of a serious accident or illness, you may be unable to speak for yourself or make your wishes known.

This Power of Attorney for Health Care meets Washington State's legal requirements for you to appoint another person to make your health care decisions if you become unable to make these decisions for yourself. This person is your health care agent. In this document you may write out any types of health care that you do or do not want, and you may limit the authority of your health care agent.

This Power of Attorney for Health Care is an important legal document that gives your health care agent broad powers to make health care decisions for you, but only when your doctors have determined you are incapable to make your own health care decisions. It does not give your health care agent any authority to make your financial or business decisions or certain decisions about mental health treatment. When you sign this document, it revokes any prior Power of Attorney for Health Care that you may have made.

If you wish to change your Power of Attorney for Health Care, you may revoke this document at any time by destroying it, by directing another person to destroy it in your presence, by signing a written and dated statement, or by stating that it is revoked. If you revoke it, you should notify your health care agent, your health care providers, and any other person to whom you have given a copy.

If you complete a new document, the one with the most recent date is the legal one.

If your Agent is your spouse and your marriage is annulled or you are divorced after signing this document, the designation of your spouse as health care agent will no longer be valid.

If you have any questions, contact **Honoring Choices Whitman County**. All services are free and confidential.

how to complete this document

This Power of Attorney for Health Care form is divided into five parts.

- PART I** appointing a health care agent
- PART II** granting authority to the health care agent
- PART III** stating desires, special provisions, or limitations
- PART IV** making the document legal
- PART V** distributing your power or attorney for health care document

Each of these parts has instructions. Please read and follow the instructions carefully.

appointing a health care agent

instructions

Understand the situation clearly. If you are no longer able to make your own health care decisions because you have been determined to be incapable under state law, the person you name to be your health care agent will make your health care decisions for you.

When selecting someone to be your health care agent, pick someone who

- is this person willing to be my health care agent?
- does he or she understand my preferences?
- will he or she follow my preferences?
- can he or she make difficult decisions in stressful circumstances

Often family members are good choices, but not always. Make sure that you pick someone who will closely follow what you want and will be a good advocate for you.

Whatever you do, take time to discuss this document and your views with the person(s) you pick to be your agent and alternate agents.

Your health care agent

- should be at least 18 years or older and
- should not be one of your health care providers or an employee of your health care provider unless they are your spouse, state registered domestic partner, or adult child or brother or sister.

Space has been provided for you to identify an alternate health care agent who will speak for you if your first choice is unavailable.

IMPORTANT!

_____ I would like my health care agent to make reasonable attempts to include the following persons in my health care decisions if there is time:

- _____ I would accept an autopsy if it can help the advancement of medicine or medical education.
- _____ I do not want an autopsy performed on me, unless required to determine cause of death.
